Robotic Foregut Symposium: Washington, DC

April 16-17, 2019

Program host

Paul Bissett
703.508.0790

Intended audience

An interactive symposium designed for general and cardiothoracic surgeons involved in hiatal/PEH repairs.

Course description

The purpose of this educational program is to facilitate discussion on successful solutions for managing robotic-assisted hiatal hernia repair and to understand the proper use of mesh materials. Discussion will include review of past and current techniques for hiatal hernia repair and the evolution of mesh utilization in these procedures. Clinical data and the science and technology of products will also be reviewed.

From the conference room, surgeons will see live cases performed.

Educational objectives

- Review current literature for hernia repair techniques, materials and patient management strategies
- Gain new insights into advanced surgical techniques for hiatal/PEH repair
- Demonstrate use of BD products in hernia repair

Faculty

George Kevin Gillian, MD, FACS

Medical Director, Harbor Heights Medical Center
Director, Heartburn Center, Inova Alexandria Hospital
Alexandria, VA

Agenda

Tuesday, April 16, 2019

- 6:30 p.m. **Meet BD Interventional Representative in Hotel Lobby and Proceed to Landini Brothers Restaurant for Dinner (115 King St)**
