Robotic-Assisted Hernia Symposium: Dallas

February 28 - March 1, 2019

Program host

JohnPaul Clark
210.244.3843

Intended audience

An interactive symposium designed for general surgeons involved in robotic ventral & inguinal hernia repair.

Course description

The purpose of the educational event is to facilitate discussion on successful solutions for managing robotic ventral and inguinal hernia repair and understanding the proper use of Ventralight™ ST w/Echo PS™ and 3DMax™ Mesh. Discussion will include a review of preclinical and clinical data, science and technology of products, and economics of robotic hernia repair.

Surgeons will have the opportunity to see cases performed directly from the operating room.

Educational objectives

- Review current literature for hernia repair techniques, materials and patient management strategies
- Gain new insights into advanced surgical techniques for robotic ventral and inguinal repair
- Demonstrate use of BD products in hernia repair

In accordance with the AdvaMed Code of Ethics, this program is limited to Healthcare Professionals only who have a bona fide interest in the presentation topic. We are prohibited by state law from providing meals to Healthcare Professionals licensed in the state of VT.

Please consult product labels and inserts for any indications, contraindications, hazards, warnings, precautions and instructions for use.
