Robotic Foregut Symposium: Georgetown, KY

March 3-4, 2019

Program host

John Kitchen
606.424.1965

Intended audience

An interactive symposium designed for surgeons involved in hiatal/PEH repairs.

Course description

The purpose of the educational event is to facilitate discussion on successful solutions for managing robotic hiatal repair and to understand the proper use of mesh materials. Discussion will include a review of techniques for hiatal, inguinal, and ventral hernia repairs, clinical data, and the science and technology of products.

From the operating room, surgeons will see live cases performed.

Educational objectives

- Review current literature for hernia repair techniques, materials and patient management strategies
- Gain new insights into advanced techniques for hiatal/PEH, inguinal and ventral hernia repairs
- Demonstrate use of BD products in hernia repair

In accordance with the AdvaMed Code of Ethics, this program is limited to Healthcare Professionals only who have a bona fide interest in the presentation topic. We are prohibited by state law from providing meals to Healthcare Professionals licensed in the state of VT.

Please consult product labels and inserts for any indications, contraindications, hazards, warnings, precautions and instructions for use.
